Field Map

Offline map for BC and Alberta · works with no signal once map data is installed

Find a place

1. Type in the search box at the top: an address, *Main St & 5th Ave*, a facility, *Hwy 97 km 120*, or coordinates (decimal, DMS, MGRS, UTM).
2. Tap a result to centre the map on it.
3. Press and hold anywhere (right-click) → **What's here?** for the nearest address and every coordinate format.

Directions

1. Tap a place → **Directions here** (or toolbar **Directions**).
2. Choose **Car**, **Emergency**, **Truck** (enter height/weight/length) or **Walking**.
3. **Start** for turn-by-turn with spoken prompts; it re-routes if you leave the route.
4. Drawn road closures are avoided. Turn restrictions are obeyed.

Nearest help

- Toolbar **Nearest** → AEDs, hospitals with ED, fire halls… sorted by **drive time** (AEDs also show walking time).
- Tap a facility for details, source and last-verified date.

Copy a location for dispatch

- Any details panel → **Copy for dispatch**; paste into CAD, e-mail or text.
- Status bar: tap a coordinate to copy it.

Mark up the incident

- Toolbar **Draw**: incident pin, staging, rendezvous, landing zone, cordon, perimeter, **road closure**, range rings, measure, **hazmat zone** (isolation + downwind).
- More ▾ → **Incidents & drawings** to list, export (KML/GeoJSON/GPX) or import.
- More ▾ → **Export map as PNG/PDF** or **Print map**.

Map files from an event

- Drag a KML, KMZ, GPX, GeoJSON or CSV onto the map (or More ▾ → **Import map file**).
- Layers → **Event layers**: show/hide, zoom to, fade the site plan, remove.

Map controls

+ / − / Me / N↑	Zoom, follow my GPS, north-up / heading-up
Map / Sat / Hyb	Map, imagery, imagery with roads (if imagery is installed)
Pinch / two fingers	Zoom / rotate; two-finger tap zooms out
Layers	AEDs, hydrants, gates, live feeds, APRS…
APRS label (status bar)	Stations list, messages; turns **red** for an APRS emergency

Keys

`Ctrl`+`F`	Search
`Ctrl`+`T` / `D` / `N`	Touch Mode / Daylight / Night
`Esc`	Close the side panel
`Ctrl`+`H`	Launcher

Field Map supports, and does not replace, CAD and dispatch. Map data, AED locations and event files can be wrong or out of date: confirm with dispatch. A red SAMPLE DATA banner means the map is fictitious.

Map data © OpenStreetMap contributors (ODbL) and Open Government Licence sources listed in About & data sources.

Field Toolkit

First aid, CPR, hazmat, location, timers, checklists, kit and radio · works offline

First Aid

- Type what you see (*not breathing*, *bleeding*, *bee sting*) or pick a topic. **Start here: scene safety** comes first.
- One step per screen: ← / → or the big buttons. Red banner = when to call 911.

CPR Helper

- Pick Adult / Child / Infant → **Start** (or `Space`). Push to the beat (100–120/min); follow **GIVE 2 BREATHS** prompts; swap compressors every 2 min.
- Starting it records "CPR started" in Timers.

Hazmat (ERG 2024)

- Enter the 4-digit **UN number** on the keypad, a name, or "guide 128"; or tap a **placard**.
- Green = Table 1 material: read isolation and protective-action distances (day/night, small/large spill).

Location

- Lat/long, DMS, **MGRS**, UTM; tap a line to copy.
- **Read out on the radio** spells the grid in radio figures.
- **Copy for dispatch**; **Save point** for the incident or rendezvous (live distance and bearing).
- **Open in map** shows it in Field Map.

Timers

- Tap **Tourniquet**, **CPR**, **Road closure**, **Crew on duty**… Timers keep running when the window or app is closed.
- An alert flashes and turns red until someone taps it.

Checklists · Kit

- Run a checklist (vehicle pre-trip, medical kit, shift handover): **OK / Fault / N/A** per item, timed; a fault asks for a note. **Copy report** lists faults.
- Kit: expiry or service dates for kits, meds, AED pads, O_2, extinguishers. **Red** = expired, amber = due soon; **Checked today** / **Replaced…**.

Radio & Comms

- Phonetic alphabet and live speller, procedure words, **METHANE** report.
- Channel plan and call signs; time-stamped **radio log** (**+ My location** adds your grid); copy or save it.

Windows

- Every tool opens its own window; **+ Window** opens another of the same tool.
- Launcher **Arrange**: side by side, stacked, grid. **Pin on top** keeps a window in front.

Keys

`Ctrl`+`T` / `D` / `N`	Touch Mode / Daylight / Night
`Ctrl`+`L`	Launcher
`Space`	Start/stop CPR metronome
`Esc`	Back to the list

The first aid guide supports training; it does not replace it. Follow your training, your protocols and the dispatcher. Use the hazmat guide with the printed ERG for Table 3 large spills.

Incident Report Manager

Record, track and print incident reports · 96 forms · stored on this computer

Write a report

1. **File** → **New Report** (Ctrl+N) → pick the category and form.
2. Fill in the sections. Fields marked ***** are required to submit.
3. **Save** (Ctrl+S) as you go – it stays a **Draft**.
4. **Submit Report** when complete. Reviewers use **Begin Review** and **Close Report**; **Reopen** to change a closed report.

Add to a report

- **Attachments**: photos, statements, documents (kept inside the database).
- **Create Follow-Up Report** (Ctrl+Shift+N): investigation, corrective action, witness statement… with the incident details copied in.
- **Linked Reports** shows the original and its follow-ups.

Find a report

- Filter by status, date and category; Ctrl+F searches every field.
- Click a column header to sort; the preview pane shows the selected report.

Print and export

- **File** → **Print** (Ctrl+P) or **Print Preview**; blank forms can be printed to fill in by hand.
- **Export Report as HTML**; **Export List to CSV**.

Look after the data

- **File** → **Back Up Database** regularly (works while the app is open). Keep backups somewhere safe.
- **Tools** → **Options**: organisation name, default reporter, report-number prefix, database location.
- Closed reports are read-only; every change is in the audit history.

Keys

Ctrl+N	New report
Ctrl+O	Open selected report
Ctrl+S	Save (in a report)
Ctrl+P	Print
Ctrl+F	Search
Ctrl+T / D	Touch Mode / Daylight

Reports can contain personal and health information. Lock the laptop when you step away, don't copy reports to personal devices, and follow your organisation's privacy and retention rules.
